100% CERTIFIED ORGANIC GARDENING INPUTS

Agri Life™ introduces a new concept of 'Green Organic Fingers' with this handy Garden Biokit that has 100 % certified organic inputs. Safe to children, pets and environment, this kit has components that can be used for 100 pots /plants for 2 months. Now grow your choicest vegetables, have natural cascading waterfalls of bright blooming flowers and enjoy an organic harvest everyday in your kitchen / balcony/terrace garden. Say bye to toxic pesticides / chemicals and love your plants nourishing them and protecting them all organically. Breathe the fresh air from the blooms in your mini garden paradise, unwind yourself plucking veggies from your pots or just enjoy sitting near your organic heaven enjoying a meal.

BIOKIT contains:

- **AgriLife Nitrofix™ AC:** Nourishes the pot / garden soil
- **Somzyme®:** A growth promoter and yield booster
- **AgriLife Agriboom™:** Protects your blooms and makes fruits tastier and appealing in appearance
- **Racer™:** Protects your plants from chewing pests
- **Pacer®:** Protects your plants from soil pests
- **Mealikil®:** Protects your plants from sucking pests
- **Ecosom®-TH:** Protects your plants from a wide spectrum of fungal disease

How to Use?:

AgriLife Nitrofix® AC:

Apply @ 1 g per pot. Helps fix atmospheric nitrogen. It nourishes the pot / garden soil. Use once in 15 days

Somzyme®:

Spray @ 2ml/ L water dilution. Somzyme® contains sea weed fermentation derivatives that help address growth factors and micronutrient deficiencies and aids in flowering . Use once in 15 days till flowering stage

AgriLife Agriboom™:

Spray @ 2 ml / L water dilution. It aids in cell division, elongation and promotes root and shoot growth in the initial growth stages. During flowering, it improves flower retention, fruit quality, taste and fruit appearance. Use once a week for best results.

Racer™:

Spray @ 2g / L water dilution. Helps control chewing pests / foliar feeding pests /caterpillar pests. Use once a week to reduce pest density. Spray some water to increase environment humidity before using Racer™ for product to work better.

Pacer®:

Apply @ 2g / L water dilution to soil. Helps control soil pests like termites, ants and weevils that damage plant root system. Use once a week to reduce pest density.

Mealikil®:

Spray @ 2g / L water dilution. Helps control sucking pests like white flies, aphids, thrips, scale insects and mealy bugs. Use once a week to reduce pest density. Spray some water to increase environment humidity before using Mealikil® for product to work better.

Ecosom®-TH:

Spray @ 2g / L water dilution. Helps control a wide range of fungal diseases like rots, blights and other fungal diseases. Use once a week to reduce disease intensity. Spray some water to increase environment humidity before using Ecosom®-TH. This is compatible with components of the BioKit
