

OIKOS – DP

Anti Termite product for pre construction sites

Introduction

Termite problems are regular phenomena in construction sites and usually attack all structures that touch the ground such as moldings and door frames .

Oikos –DP is a natural mineral origin anti-termite product exclusively designed for pre construction / re modeling homes application that keeps homes termite free for years. Oikos-DP is non toxic to humans and animals and safe to environment

Mode of Action

The natural ingredients have sharp spikes on each particle. These spikes have an abrasive action on moving insects / termites resulting in the body fluid oozing out thereby killing the insect / termites

Method of Application

1. Disperse by a rotary duster over target area This formulation is suited for dry & semi wet soil conditions
2. Oikos-DP @ 10 Kg for 100 sq ft area has to be applied uniformly
3. An integrated approach of using Oikos – DP for ground and Oikos – WP for swabbing door / window frames is recommended

Note: Operator has to wear protective gear before application such as glove , goggles , mask to cover nose and mouth and protective clothing to cover the entire body

Long term termite control

Post treatment with Oikos –DP , put a prevention plan in place by getting a service plan from pest control professional.

Recommended preventive measures are outlined under:

- Gutters to always be kept clean
- Remove excessive wood mulch.

- Clear all stumps and wood around yard
- Keep firewood away from the house foundation.
- Outside vents should be covered with metal meshing.
- Make sure your yard is free from any type of paper debris.

Target Sites

- Pre construction sites
- Homes being remodeled

Shelf Life

Oikos-DP is stable for a period of 3 years from the date of manufacturing.
