

## OIKOS – WP

### Anti Termite product for door / window frames

#### Introduction

Termite problems are regular phenomena in construction sites and homes and usually attack structures such as door frames, window frames and tiles

Oikos –WP is a natural mineral origin anti-termite product exclusively designed for pre construction / remodeling homes application that keeps homes termite free for years. Oikos-WP is non toxic to humans and animals and safe to environment

#### Mode of Action

The natural ingredients have sharp spikes on each particle. These spikes have an abrasive action on moving insects / termites resulting in the body fluid oozing out thereby killing the insect / termites

#### Method of Application

1. Spray /swab Oikos-WP @ 30 g/ L of water uniformly on window / door frames.
2. Swab Oikos –WP @ 200g / L of water on specific parts such as tiles that are closer to water for control
3. An integrated approach of using Oikos – WP for swabbing door / window frames and Oikos – DP for the ground is recommended

Note: Operator has to wear protective gear before application such as glove , goggles , mask to cover nose and mouth and protective clothing to cover the entire body

#### Long term termite control

Post treatment with Oikos –DP , put a prevention plan in place by getting a service plan from pest control professional.

Recommended preventive measures are outlined under:

- Gutters to always be kept clean
- Remove excessive wood mulch.
- Clear all stumps and wood around yard
- Keep firewood away from the house foundation.

- Outside vents should be covered with metal meshing.
- Make sure your yard is free from any type of paper debris.

### Target Sites

- Pre construction sites
- Homes being remodeled

### Shelf Life

Oikos-DP is stable for a period of 3 years from the date of manufacturing.
